

# INTERIOR GAS UTILITY

## QUARTERLY UPDATE - Q1 2022

# 2021 Look-back

## Hilcorp Contract

In January, IGU signed a contract with Hilcorp that will provide stability in natural gas purchase pricing for up to 11 years.

## Natural Gas in North Pole

IGU started the year with another big accomplishment - bringing natural gas for the first time in history to the community of North Pole.

## National Awards

Interior Gas Utility received two national awards - a safety award and a marketing award.

# 2021 Look-back

## New Services

We installed 311 new services and more than 6 miles of main lines during the 2021 construction season.

## Preferred Contractors

Lack of contractor availability is a barrier customers list when they fail to meet our six months agreement. We now have a list of contractors that are available to work on our customers' installations.

## New Building

IGU moved to 2525 Phillips Field Road. This is a much more convenient location for our customers and the first administrative building the utility has owned.

# What about 2022?

## Build Back Better

After a comprehensive, merit-based review, the Alaska Railbelt Clean Energy Transportation Infrastructure Growth Cluster proposal was not selected for Phase 2. The grant received 529 applicants, representing all 50 states and 5 territories. Of those, 60 were selected for Phase 2, with two being Alaska based.

## FNSB Oil to Gas Conversion

IGU is working with FNSB Air Quality Program to relaunch the applications and streamline processes for the oil to gas conversion program. The Assembly allocated \$1MM from the ARPA funds and we are hopeful that an additional \$3.2MM will be received from the Targeted Airshed Grant.

## Natural Gas Service

We plan to nearly double the number of service lines we installed this summer and connect 600 new services next year. Service maps are available at [interiorgas.com](http://interiorgas.com)

# Pending Gas Service Requests Report

## Total Gas Service Requests: 654

- Installed in 2021: 311
- Approved for 2022 construction: 41
- Canceled: 70
- Main line not available and extension not feasible: 145

## Remaining Requests: 87

- Residential - 73
- Commercial - 14
- North Pole - 30
- Fairbanks - 57
  
- Will likely not go through with the installation - 14
- Waiting on FNSB conversion grant - 7
- Will maybe become 2022 installations - 33
- Will become 2022 installations - 23
- IGU has to follow up to get status - 10

# Applicant Profile

---

40% don't have a main line immediately available

80% are residential properties

40% are in North Pole

60% end up being approved for construction
